

BRANSON

VIBRATION WELDER REFURBISHMENT PROGRAM

In today's global marketplace, staying competitive is a constant challenge. After all, that's one of the major reasons you selected Branson equipment.

Meeting that challenge means assigning the right team to every task – whether it's equipment calibration, preventative maintenance or training your people in the new knowledge and skills they need – Branson meets the challenge.

Branson's commitment to your success includes providing you with constant access to our talents and technologies. It was with this in mind that Branson, the pioneer in vibration welding with over 35 years of real-life design, production, maintenance and repair experience, developed our *Vibration Welder Refurbishment Program*.

Designed to offer an affordable alternative to the purchase of new equipment, this flexible program can be tailored to your unique needs and can be a powerful tool in helping you:

- *Retooling for new programs*
- *Increase productivity and cost-efficiency*
- *Increase utilization of existing capitol*
- *Extend the useful life of current production equipment*
- *Improve quality*

Let us help you bring your existing machinery back to optimal working condition. Whether you are simply looking for cosmetic changes or a complete system overhaul, contact contact our Detroit Service Center at 586-276-0150, ext. 9 today! Our Service Technicians are on hand to explain the full range of choices which can be customized to your exact specifications.
